

USDTz — Tokenomics & Distribution

Document Version: v1.0 • Last Updated: 25 September 2025

Network / Standard	BNB Smart Chain (BSC) – BEP-20
Decimals	6
Total Supply	100,000,000,000 (fixed)
Emissions	None; minting disabled post-deployment
Fees / Taxes	0% — no taxes, no blacklist
Contract Mixins	Pausable, Permit (EIP-2612)
Primary Use-case	OTC settlement & collateral (non-speculative)

Total Supply

100,000,000,000 (6 decimals).

Emissions

None; minting disabled post-deployment (see verified contract).

Taxes / Blacklist / Features

None. Contract supports Pausable and Permit (EIP-2612) as documented.

Use-case

OTC settlement & collateral (non-speculative).

Circulating Supply Formula

Circulating Supply = Total Supply – Non-circulating balances.

Non-circulating Definition

- labeled wallets (team / treasury / operational escrow / time-locked or programmatically restricted).

Transparency & Disclosures

Labeled wallets and updates are published on the Transparency hub with a machine-readable CSV (Circulating).

Methodology Rule

On-chain > documents (on-chain state is authoritative).

Non-affiliation

Not affiliated with Tether or USDtez (USDTZ).

Reference Market

A minimal PancakeSwap v3 USDTz/USDT pool exists for price discovery only near 1:1 — no market-making or incentives.
