

USDTZ – Terms to Market & Collateral Framework

Issued on Binance Smart Chain (BEP-20) for OTC Trading & Collateralization

1. Executive Summary

USDTZ is a BEP-20 token on Binance Smart Chain, designed as a stable-pegged asset intended for OTC transactions, trading collateral, and financial simulations. Its value is anchored 1:1 with USDT via an on-chain liquidity pool.

2. Token Overview

- Token Name: USDTZ (Tether USD Bridged ZED20)
- Symbol: USDTZ
- Decimals: 18
- Total Supply: 1,000,000,000 USDTZ
- Contract: 0x5a90Ec8873969982b82B80d246F70898c0b6A0BC
- Audit: Independent Security Review

3. Market Application

- Designed for Over-The-Counter (OTC) trading.
- Can be used as collateral in bilateral deals.
- Stable peg to USDT ensures predictable valuation.
- Suitable for institutional simulations and liquidity testing.

4. Liquidity & Stability

- Liquidity Pool on PancakeSwap V2 (USDTZ/USDT).
- Maintained peg: 1 USDTZ = 1 USDT.
- Swap proofs available on-chain.

5. Governance & Security

- Smart Contract verified on BscScan.
- Independent Audit performed (low risk).
- Transparent supply and public liquidity.

6. Risk Disclosure

USDTZ is an independent token not affiliated with Tether Limited. It is intended for OTC, collateral and demonstrative purposes only. Market participants should conduct their own due diligence.
